

Amendments to the Specification:

Please replace paragraph [43] with the following amended paragraph:

[43] Further, the mark type (e.g., mark-type) can ~~use~~ use other indications or values such as a number instead of the ~~master~~ master and general resume mark indicator. A number for the ~~mark_type~~ mark-type can be designated or granted step by step (e.g., sequentially), and the master resume mark should be the resume mark that has the biggest number as mark-type and other numbers are preferably general resume marks. ~~As~~ An advantage of using numbers or the like is that updating of the mark-type info in old resume marks (e.g., general) can be concurrently performed.
